

## Offshore Custody

Platform Securities can provide Offshore custody solutions through a dedicated Jersey based company – Platform Securities International Limited.

The entity was established in response to client demand for both onshore and offshore services through the same provider. Clients who take up the Offshore service will enjoy all the benefits of Platform Securities' award-winning service, with custody held by a Jersey domiciled entity for the benefit of UK non-domiciled and non-resident clients.

Platform Securities International will be providing control & oversight, as well running a streamlined yet thorough Customer Due Diligence and Sanction checking process. Clients may sign up to receive a purely Offshore service or can take the service on alongside an onshore service, in a separate but similar operational system.

The full suite of functionality will be available, such as:

- A single-database system, all updated in real-time
- Portfolio modelling & rebalancing tools
- Fully-branded end-client reporting
- Multi-asset, multi-market and multi-currency coverage
- Web portal branded in your look and feel
