

TrackIT

Platform Securities understands the importance of providing solutions to our clients' enquiries in a timely and systematic manner.

We have therefore created a bespoke online service for our clients, called TrackIT.

With the globally recognised BMC Footprints system at its core, TrackIT gives our clients visibility to all their requests, developments and communications, over a secure and easy to use internet-based system.

Our clients use TrackIT to raise enquiries directly to Platform Securities and apply real time updates onto existing tickets. With accompanying reporting outputs and full internal audit on each request, this service gives our clients the governance and control they expect and deserve.

This interactive and robust system builds on our commitment to give our clients a complete service that is quick, efficient and effective.

If you are an existing TrackIT user, you can log in by clicking [here](#).
