

6 WAYS TO TRANSFORM YOUR BUSINESS NOW WITH DIGITAL PAYMENTS

Fast digital payments can fill an immediate and urgent need. Market and industry disruption have created a significant financial strain on organizations, workers and consumers alike. Businesses can use prepaid cards to provide digital payroll, gift cards and incentives. Government agencies can issue prepaid cards to provide pandemic and disaster relief, tax refunds, social security payments, unemployment payments and more. Here's how this innovative payment tool can help you meet business needs now:

1. ATTRACT TOP TALENT AND PARTNERS BY PROVIDING SAME-DAY ACCESS TO EARNED INCOME.

Make same-day payments to anyone, including vendors, suppliers, employees, contractors, gig workers and citizens. Achieve 100% digital payroll for all your staff.

Help your employees improve their cashflow and avoid high overdrafts. Your partners will appreciate transparent, reliable payments that end the endless cycle of call center calls to verify receipt of invoices and payment timetables. And citizens can use prepaid cards to pay bills and stabilize their finances.

2. DELIVER A BETTER CUSTOMER EXPERIENCE IN ANY INDUSTRY.

Companies in competitive industries, including healthcare, manufacturing and retail, can attract and retain talent with same-day payments.

Insurance companies can streamline claims management and generate faster payments, while increasing policy holder satisfaction.

Government agencies can issue prepaid cards to support businesses and individuals at a time of need, by providing rapid access to all the financial benefits they qualify for.

3. UNDERSTAND YOUR CASHFLOW AND FINANCIAL POSITION IN REAL-TIME.

The C-suite at your company wants to strengthen key controls and cashflow, reduce risk and enable highly accurate financial management.

Gain complete visibility into your financial position, while accelerating cashflow with daily, rather than monthly, accruals.

Make strategic decisions with confidence, knowing that they are based on highly accurate data.

4. OPTIMIZE FINANCIAL PROCESSES, WHILE REDUCING OPERATIONAL COSTS.

Trade analog paper-based payment processes for digital payments with global reach, infinite scale and end-to-end digital workflows.

Reduce the costs associated with receiving and processing checks.

Simplify disbursements and redeploy your staff toward other duties, such as sales and customer service, to build and grow your organization.

5. PROTECT YOUR BUSINESS FROM FINANCIAL HARM DUE TO CHECK FRAUD AND OTHER RISKS.

Your organization doesn't need to sustain losses due to lost and stolen checks and other related risks.

Make traceable payments to employees, partners, customers and citizens with digitally verified identities, eliminating identity theft and check fraud.

Prepaid cards also carry all network liability – meaning you sustain zero liability for lost/stolen cards or disputed card transactions.

6. GAIN SPEED-TO-MARKET WITH A COMPLETE DIGITAL PLATFORM AND ONGOING SUPPORT.

Count on FIS to help you meet market needs fast, with a turnkey, prepaid card-management program. You'll get a customized program that meets your needs and a highly scalable platform that can be implemented in weeks or months.

Gain peace of mind with integrated risk and fraud management, regulatory and compliance oversight, settlement and reconciliation, and the digital reporting that meets your compliance and audit mandates.

You can focus on strategic decision-making and financial operations, while FIS runs your end-to-end program.

BE TRUSTED. DIGITAL PAYMENTS YOU CAN COUNT ON.

FIS is your partner in setting up, managing and scaling digital payments. We can help you grow your business, increase profitability, decrease financial risk and gain operational efficiencies.
