REALNET™ CENTRAL VALUE PROPOSITION

FULL-SERVICE RT A2A CLEARING SOLUTION

All capabilities required to power a RT A2A clearing network in one-modular-package. Flexibility to support deferred net and real-time settlement.

MODERN OPEN ARCHITECTURE

Open-API, ISO20022 layered architecture. Seamlessly add future Value-Added-Services.

SCALABILITY & AVAILABILITY

Purposely designed to handle all payment types & messages at scale, whilst maintaining high availability.

FAST-TIME-TO-MARKET

Flexible, highly configurable modules with implementations delivered within ~9 months, whilst providing a low total cost of ownership.

INTEROPERABILITY

Connect to multiple CSMs, domestic or cross-border, at the same time. Built to be compliant with regulation and industry standards.

PROVEN DEPLOYMENTS

Successful implementation via on-premise and managed service models.
