

# FIVE THINGS TO KNOW ABOUT...

## FIS™ PRIVATE EQUITY RAINMAKER

Get to know FIS' innovative private equity portfolio data management solution.

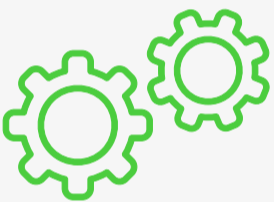

FIS™ Private Equity Rainmaker automates private equity portfolio company data management processes and streamlines portfolio analysis, providing partners, deal teams, investment analysts and portfolio managers with accurate, on-demand insights so they can make investment decisions that generate alpha and deliver growth.

### 1. RAINMAKER IS BUILT FOR PRIVATE EQUITY FRONT OFFICE TEAMS

At FIS, we are known for our industry-leading private equity partnership accounting and fund reporting solutions Investran and Data Exchange. Our decades of experience and expertise in the private equity space has led to the development of Rainmaker. A cutting-edge portfolio data collection, validation, analysis and presentation solution, Rainmaker is designed for the teams that run private equity firms' front-office functions.

### 2. RAINMAKER COMBINES INNOVATIVE TECHNOLOGIES WITH AWARD-WINNING MANAGED SERVICES

With an inventory of the accounts you must certify, Rainmaker's automated task management framework helps you structure your close process, centrally assign and schedule tasks, and monitor progress. A dedicated digital packet of reconciled account balances, documentation and process and control information then moves automatically through approvals, electronic signoff and certification for each account or group of accounts, in the workflow you've designed.

### 3. RAINMAKER IS DEVELOPED ON A CONTINUOUS SERVICE DELIVERY MODEL

We have built Rainmaker to be easy to deploy and simple to run. With our continuous service delivery model, you get real-time access to the latest and greatest portfolio company data and insights, consolidated within one dashboard. No more waiting for the start of a new quarter to review your data; it's always available, in real time.

### 4. RAINMAKER IS AUTOMATING THE INTEGRATION OF PORTFOLIO DATA AND FUND DATA

Having more data can be good, but it has to be the right data. Our unique ability to automate the integration of investment data and fund accounting data in Rainmaker gives you the ability to gain a unified view of insights across the lifecycle of a portfolio and fund. All stakeholders across the firm has the same view of the truth, with on-demand access and no chasing between departments.

### 5. RAINMAKER IS AVAILABLE NOW

Smarter portfolio data management is possible – and it is available now. Join the private equity leaders who are rethinking their approach to portfolio data collection, validation and analysis. Turn away from time-consuming, error-prone data management practices in favor of an automated, streamlined approach that is designed for the future of the private equity.

We are entering a new era for private equity firms. Change how your deal teams, investment teams, portfolio managers and executives view and utilize data for a sunnier forecast.
