

WEARABLES

A New Engaging Way to Pay

Technology that Drives Engagement and Increases Revenue

FIS introduces a solution that encompasses contactless prepaid capabilities on wearables devices, that support open and closed-loop payments, eliminating the need for cash and checks, reduces fraud and most importantly, drives your customers to spend more. Customers will be able to reload their account, manage their account settings and more, all from their mobile application.

Configurable for Your Business

Our solution consists of entirely configurable items that can enhance existing infrastructure or be a standalone system. The flexible nature of wearable devices enables many innovative applications for organizations to interact with their customers.

FIS' expertise will differentiate your business in an increasingly competitive marketplace and help your bottom line.

Wearable bands, physical cards and virtual accounts encourage spend at the point of sale and grow your business.

Engagement Meets Innovation
